

CLIMATE-SMART AGRICULTURE:

# Farm-to-Tank SAF

Growing Oilseeds for Biofuel in Rural America

Prepared for **BETO Workshop on Purpose-Grown Energy Crops**

JUNE 6-7, 2023

**TEKHOLDING**  
SUSTAINABLE SOLUTIONS

# Pilot Project: Growing Carinata in Alabama

## CARINATA ETHIOPIAN MUSTARD

### Characteristics of Carinata

- ❖ **Enduring winter crop**
- ❖ **Frost, heat, drought tolerant**
- ❖ **Excellent cover crop**
- ❖ **Improves soil quality** by reducing soil erosion and improving soil fertility
- ❖ **Winter hardiness:** can be used as second cash crop during alternate seasons of main cash crop.

Carinata planting seasons\*

## THL PILOT STUDY 2022-2023 MURPHY FAMILY FARM

## BLACK BELT REGION OF CENTRAL ALABAMA

### PILOT STUDY RECRUITMENT

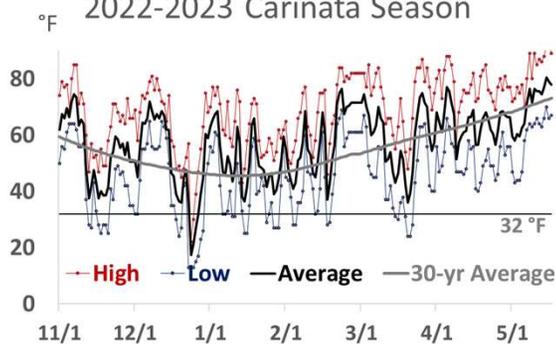

COUNTY	ACREAGE
Houston	25
Perry	100
Wilcox	103

# Relying on Data: Moving Towards the Farm of the Future

## TYPES OF DATA USED CURRENTLY

### Daily Temperature Tracking

2022-2023 Carinata Season

#### Climate Tracking

Climate information (e.g., temperature, precipitation) is **currently manually assembled** from NOAA database APIs to assess conditions and calculate trends

#### Soil Test Data

Soil is **manually collected** & shipped to local extension offices for analysis.

SOIL TEST RESULTS					RECOMMENDATIONS			
pH**	Phosphorus p***	Potassium K***	Magnesium Mg***	Calcium Ca***	LIME-STONE	N	P <sub>2</sub> O <sub>5</sub>	K <sub>2</sub> O
	Pounds/Acre				Tons/Acre	Pounds/Acre		
VL 3	H 113	H 77	H 593	1.0	120	80	0	

## FARM OF THE FUTURE

### Artificial Intelligence

Geospatial AI will be employed to assist farmers in clearly prioritizing, visualizing, and interpreting complex datasets.

### Specialized Dashboards

The development of API dashboards designed based on **individual farm needs** that **access, compile, and assess** information from sources such as data from:

- ❖ **Satellites** (e.g., LandSat, SentiNel)
- ❖ **Sensors** (e.g., soil compositions, sublocal temperature readings)
- ❖ **NOAA** (e.g., temperature, precipitation)
- ❖ **Crowdsourced observations**

to provide farmers with clear, precision-based snapshots that aid in real-time decision making.

# THL's Roadmap of Technological & Economic Development

## DEVELOPING the FARM OF THE FUTURE

**Recruitment of small, rural farms**  
with a focus on disadvantaged communities

Black-belt of AL

Cherokee tribe in NC

Blackfeet tribe in MT

More to come

Development of **regional cooperatives** to eliminate barriers in agricultural development of the **purpose-grown energy crop industry**

**Grow region-specific oilseeds for SAF production**  
such as carinata, camelina, pennycress

Implement **climate-smart** methods with **data-based ag** and identified metrics of success for **sustainable agricultural practices**

Geospatial AI

Specialized dashboards

Application programming interfaces (API)

Localized sensors

## PRODUCING and VALIDATING SUSTAINABLE AVIATION FUEL

**Seed oil extraction from THL-grown oilseeds**

**Flight testing of THL's oilseed-based SAF**

**2-step SAF production from raw seed oil**
